

Lights in the Darkness

You will need:

- World template printed onto a piece of card
- 1 shoebox
- Pins
- 1 LED tea-light
- Blu tac or similar

How to make your Lights in the Darkness

1. Place the LED tea-light inside the open shoebox. Switch on the light.
2. Take the world template and using a pin, make a small hole in Israel/Palestinian territories (the Middle East) to represent Jesus coming as the light of the world. Fix the card to the box using the blu tac and making sure that light cannot escape from the box. Look at the effect of this one bright pinpoint of light in our world.
3. Now remove the card again and add more pinpricks randomly among the continents. Fix the template once again to the box and this time see how the light which Jesus brought has now spread right across the world.

Talk about: How Jesus came to one place at one point in history with God's light but now his followers are to be those lights right around the world, pushing back the darkness.
